# Overview

The Iraqi Society of Cataract & Refractive Surgery (ISCRS) is pleased to announce the 5th Mesopotamia Ophthalmology Conference for Advanced Techniques (MOCAT 5), which will be held on January 22–23, 2026, at the Mövenpick Hotel in Baghdad.

Building on the success of previous editions, MOCAT 5 will deliver a world-class scientific program covering the full spectrum of ocular conditions.

The meeting will bring together a distinguished faculty of international and regional experts to present the latest evidence, share surgical pearls, and explore cutting-edge developments in ophthalmic innovation.

Delegates will have the opportunity to participate in near live surgery sessions, surgical video symposia, challenging case discussions, and hands-on wet labs, ensuring a highly interactive and practical learning experience.

With dedicated tracks in cataract, refractive surgery, retina, glaucoma, cornea, ocular surface disease, uveitis, and oculoplasty, MOCAT 5 provides an unparalleled forum for advancing skills, exchanging knowledge, and fostering collaboration that will shape the future of eye care in Iraq and beyond.
